Indigenous Manufacture of Condoms in the Country

265. SHRI H. HANUMANTHAPPA: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state;

(a) what is the requirement of various types of condoms in the country;

(b) how much of it is manufactured ingigenously; and

(c) wnat steps Government propose to take to stop import of condoms?

THE MINISTER OF STATE IN THE MINISTRY ' OF HEALTH AND FAMILY WELFARE (KUMARI SAROJ KHAPARDE): (a) The requirement of condoms is worked out basing upon the target of Conventional Contractptive users fixed for the year. Under the Free Distribution Scheme only condoms of the 'Normal' variety are supplied. Both 'Deluxe' and 'Normal' varieties of condoms are sold through the Social Marketing of Contraceptives Programme. The share of each will depend upon the demands, and, it js decided 'at the beginning of the year, basing on the forecasts of sales, received from the Marketing Companies. For 1986^87, the total requirement of CondomSvfjlr both the Programmes is 756 million P<». This is outside the quantities, the London Rubber Co., and other Firms sell' in the open market, under their Brand names.

(b) The installed production capacity of Condoms $_0$f the three factories; n the country is 713 million pes. per annum as per break up given below; -

(//i *million pes.)*

(i) Hindustan Latex Ltd., Trivandrum (A f ublic Sector Undertaking of Ministry of Health & Family Welfare).... 288

(ii) M|s. LORCOM (Protectives) Ltd., Aurangabad, (A Joint Sector Company of London Rubber Co. & Government $_0$f Maharashtra)... 200

(iii) M]s. London Rubber Co., Madfas (A Private Co., of the TTK Group).. 225 '

(c) So far, the entire requirements $_0$f condoms of family Welfare Programme were met from indigenous production. However, during the current year 200 million pes. 'are being imported through the UNFPA, in view of the continuous labour trouble and the final jock-out of LORCOM (Protectives). Ltd., Aurangabad in December, 1985.

For increasing the indigenous production, two new plants, one each at Trivandrum and Belgaum, with 'annual production' capacity of 160 million pes, each, have been installed, by the Hindustan Latex Ltd. The Trivandrum unit has started production and, the Belgaum un£ is likely to go in for production before the end of the current year. Similarly, M|s. London Rubber Company, Madras has also augmented their capacity by adding 'another unit with a capacity "of 60 million pes. per year.

At the moment, Condoms are imported under the OGL, and, Considering both the inadequate indigenous production of condoms and the large number of couples to be protected, if is considered premature to stop import,, of condoms into the country.
